

Dynamic Event Features – Feature Breakdown

1. Dynamic Pricing Engine

- *Rule-based dynamic pricing*
 - Automatically adjust prices based on time, demand, inventory, and event type.
- *Price bands / guardrails*
 - Let organizers set minimum and maximum price limits so discounts or surges stay within acceptable bounds.
- *Time-based pricing*
 - Apply weekday, weekend, morning, evening, holiday, or last-minute pricing logic.
- *Inventory-based pricing*
 - Lower or raise prices depending on unsold seats / slots / tickets remaining.
- *Demand-based pricing*
 - Adjust pricing based on booking velocity, views, search activity, and expected turnout.
- *Early-bird / late-stage pricing*
 - Reward early bookings or push final-hour deals to fill unsold capacity.

2. Perishable Inventory Management

- *Empty-seat / empty-slot detection*
 - Identify underbooked showtimes, classes, tables, or private sessions in real time.
- *Time-to-expiry tracking*
 - Measure how close an event or slot is to becoming worthless because the time window is about to pass.
- *Capacity health indicator*
 - Show organizers whether an event is underfilled, healthy, or near sold out.
- *Automatic discount triggers*
 - If a threshold is met (for example, 40% unsold 4 hours before start), automatically activate a deal.
- *Last-minute inventory release*
 - Push unsold capacity into "Tonight," "Near you now," or "Last-minute deals" sections.

3. Smart Offer Types

- *Last-minute deals*
 - Discount unsold capacity close to event time.
- *Off-peak offers*
 - Encourage demand for weekday, matinee, morning, or low-demand time windows.
- *Family bundles*
 - Offer price bundles for adults + kids or group attendance.
- *Group-fill offers*
 - Discounts activate when a certain number of attendees book together.
- *Flash promotions*
 - Short-lived offers with urgency timers.
- *Package pricing*

- Bundle event + food + extras or multi-event access into one offer.

4. Organizer Controls

- *Pricing rules builder*
 - Configure when and why pricing changes happen, using conditions and thresholds.
- *Manual override*
 - Organizers can pause or override AI/recommended pricing anytime.
- *Approval-based automation*
 - The system suggests discounts, but organizers approve them before publishing.
- *Schedule-based rule presets*
 - Prebuilt templates for cinemas, workshops, restaurants, wellness slots, etc.
- *Offer visibility controls*
 - Choose whether a deal is public, limited to selected users, or only sent through notifications.
- *Capacity reservation rules*
 - Hold back some inventory from discounting if needed.

5. AI Demand Forecasting

- *Attendance prediction*
 - Forecast expected turnout for each event or time slot.
- *Demand score*
 - Give each listing a score such as low / medium / high expected demand.
- *Booking velocity monitoring*
 - Track how quickly tickets or slots are being taken and compare against expected pace.
- *Best discount recommendation*
 - Suggest whether to offer 10%, 20%, or 40% based on expected conversion uplift.
- *Best send-time recommendation*
 - Predict when to push a notification or promotion for maximum uptake.
- *Seasonality / local signal analysis*
 - Factor in day of week, local events, weather, holidays, and trends.

6. User Discovery & Matching

- *Radius-based event matching*
 - Show users events and deals within a chosen distance from them.
- *Time-window matching*
 - Recommend events happening "now," "tonight," "this weekend," or within user availability.
- *Budget-aware recommendations*
 - Match events to a user's spending preference and highlight discounted options.
- *Interest-based recommendations*
 - Use past clicks, bookings, categories, and saved preferences to personalize discovery.
- *Deal sensitivity matching*
 - Identify users more likely to respond to discounts and surface dynamic offers to them.
- *Cross-category suggestions*
 - Recommend nearby alternatives like movie + dinner, workshop + café, etc.

7. Dynamic Notifications & Urgency

- *Smart push alerts*
 - Notify the right users when a nearby event drops in price or has open capacity.
- *Urgency messaging*
 - Messages like "Starts in 2 hours," "Only 8 seats left," or "40% off until 6 PM."
- *Watchlist / alert subscriptions*
 - Users can follow a venue, category, or price threshold.
- *Drop alerts*
 - Notify when price falls below a user's preferred level.
- *Quiet-hour and frequency controls*
 - Avoid spam and let users control how often they are notified.

8. Offer Presentation & UX

- *Dynamic pricing badge*
 - Mark listings with labels like "Last-minute deal," "Off-peak special," or "Price dropped."
- *Original vs current price display*
 - Clearly show discount amount and savings.
- *Reason-for-offer explanation*
 - Explain why a discount exists, such as low-demand showtime or special weekday offer.
- *Countdown timers*
 - Show how long an offer remains active.
- *Trust messaging*
 - Make pricing feel fair and rule-based so users do not feel manipulated.

9. Organizer Analytics Dashboard

- *Revenue vs occupancy view*
 - Compare earnings and fill-rate for each event or slot.
- *Discount performance analysis*
 - See how each offer affected bookings, revenue, and utilization.
- *Conversion by audience segment*
 - Track which user groups respond best to dynamic offers.
- *Pricing experiment results*
 - Compare different discount strategies and outcomes.
- *Channel performance*
 - Measure results from app feed, push alerts, SMS, email, etc.
- *Forecast vs actual*
 - Compare predicted attendance to real turnout for learning and model tuning.

10. Dynamic Event Types to Support

- *Cinemas*
 - Empty weekday seats, matinees, late-night showtimes.
- *Workshops & classes*
 - Spare spots in cooking, language, coding, art, or fitness sessions.
- *Restaurants & food events*
 - Off-peak seating, tasting nights, chef-table events.
- *Wellness & beauty appointments*

- Last-minute salon, spa, massage, or consultation slots.
- *Tours & activities*
 - Walking tours, guided visits, local excursions, escape rooms.
- *Micro-events*
 - Small community events, talks, pop-ups, and local gatherings.

11. Safeguards & Trust Controls

- *Min-price floor*
 - Prevent pricing from dropping too low.
- *Discount frequency limits*
 - Avoid training customers to wait for discounts.
- *Eligibility rules*
 - Some offers can be limited to first-time users, nearby users, or selected segments.
- *Transparent pricing policy*
 - Explain how pricing works to preserve trust.
- *Host review queue*
 - Give organizers a final review step before major price changes go live.

12. MVP Recommendation

For a first version, prioritize:

1. Dynamic pricing rules with min/max guardrails.
2. Empty-seat / empty-slot detection.
3. Last-minute and off-peak offers.
4. Radius-based user discovery for discounted events.
5. Smart notifications for nearby deals.
6. Organizer dashboard with occupancy, bookings, and discount results.
7. Forecasting-lite recommendations (basic demand score + suggested discount).
